

# Unit Converter App - Complete Documentation

## 1. Project Overview

### App Name

Unit Converter Pro (or choose your preferred name)

### Description

A simple, fast, and offline unit converter app that helps users convert between different units of measurement across multiple categories.

### Target Platform

- Android (Google Play Store)
- Minimum SDK: API 21 (Android 5.0)
- Target SDK: API 34 (Android 14)

### App Type

Utility/Tools

---

## 2. Features & Functionality

### Core Features

#### 1. Multiple Conversion Categories

- Length (meters, km, miles, feet, inches, cm, mm)
- Weight (kg, grams, pounds, ounces, tons)
- Temperature (Celsius, Fahrenheit, Kelvin)
- Volume (liters, ml, gallons, cups, fluid ounces)
- Area (sq meters, sq feet, acres, hectares)
- Speed (km/h, mph, m/s, knots)

#### 2. Real-time Conversion

- Instant results as user types
- High precision calculations
- Support for decimal values

#### 3. User-Friendly Interface

- Clean, modern Material Design
- Easy unit selection with dropdowns
- Swap button to reverse conversion
- Clear button to reset values

#### 4. Additional Features

- Recent conversions history
- Favorite conversions quick access
- Dark mode support
- Completely offline (no internet required)

---

### 3. Technical Architecture

#### Technology Stack

- **Framework:** Flutter 3.x
- **Language:** Dart
- **State Management:** Provider
- **Local Storage:** shared\_preferences
- **Design:** Material Design 3

#### Project Structure

```
lib/  
├── main.dart  
├── models/  
│   ├── conversion_category.dart  
│   ├── unit.dart  
│   └── conversion_history.dart  
├── providers/  
│   ├── conversion_provider.dart  
│   └── theme_provider.dart  
├── screens/  
│   ├── home_screen.dart  
│   ├── conversion_screen.dart  
│   ├── history_screen.dart  
│   └── about_screen.dart  
├── widgets/  
│   ├── category_card.dart  
│   └── unit_dropdown.dart
```

## Key Dependencies (pubspec.yaml)

```
yaml

dependencies:
  flutter:
    sdk: flutter
  provider: ^6.1.1
  shared_preferences: ^2.2.2
  google_fonts: ^6.1.0
  flutter_launcher_icons: ^0.13.1
```

## 4. Conversion Logic

### Length Conversions

Base unit: Meter

- 1 km = 1000 m
- 1 mile = 1609.34 m
- 1 foot = 0.3048 m
- 1 inch = 0.0254 m
- 1 cm = 0.01 m
- 1 mm = 0.001 m

### Weight Conversions

Base unit: Kilogram

- 1 gram = 0.001 kg
- 1 pound = 0.453592 kg
- 1 ounce = 0.0283495 kg
- 1 ton = 1000 kg

## Temperature Conversions

- Celsius to Fahrenheit:  $(C \times 9/5) + 32$
- Fahrenheit to Celsius:  $(F - 32) \times 5/9$
- Celsius to Kelvin:  $C + 273.15$
- Kelvin to Celsius:  $K - 273.15$

## Volume Conversions

Base unit: Liter

- 1 ml = 0.001 L
- 1 gallon (US) = 3.78541 L
- 1 cup = 0.236588 L
- 1 fluid ounce = 0.0295735 L

## Area Conversions

Base unit: Square Meter

- 1 sq km = 1,000,000 sq m
- 1 sq foot = 0.092903 sq m
- 1 acre = 4046.86 sq m
- 1 hectare = 10,000 sq m

## Speed Conversions

Base unit: Meters per second

- 1 km/h = 0.277778 m/s
- 1 mph = 0.44704 m/s
- 1 knot = 0.514444 m/s

---

## 5. UI/UX Design Guidelines

### Color Scheme

**Light Mode:**

- Primary:  #2196F3 (Blue)
- Secondary:  #03A9F4 (Light Blue)

- Background:
- Surface:
- Text:

### Dark Mode:

- Primary:
- Secondary:
- Background:
- Surface:
- Text:

### Typography

- Headers: Google Fonts - Poppins (Bold)
- Body: Google Fonts - Roboto (Regular)
- Numbers: System Monospace

### Screen Layouts

#### Home Screen

- App bar with title and settings icon
- Grid view of conversion categories (2 columns)
- Each card shows category icon and name
- Bottom navigation (optional): Home, History, About

#### Conversion Screen

- App bar with category title and back button
- Input field for value (large, centered)
- "From" unit dropdown
- Swap button (icon)
- "To" unit dropdown
- Result display (large, prominent)
- Clear button
- Optional: Save to favorites button

## History Screen

- List of recent conversions
  - Each item shows: value, from unit, to unit, result
  - Swipe to delete
  - Clear all button
- 

## 6. Development Phases

### Phase 1: Setup (Day 1)

- ☐ Create Flutter project
- ☐ Add dependencies to pubspec.yaml
- ☐ Set up project structure (folders)
- ☐ Configure app icon and splash screen
- ☐ Set up Android permissions and configurations

### Phase 2: Core Functionality (Days 2-3)

- ☐ Create data models (Category, Unit)
- ☐ Implement conversion logic for all categories
- ☐ Create Provider for state management
- ☐ Build home screen with category grid
- ☐ Build conversion screen with input/output

### Phase 3: UI Polish (Day 4)

- ☐ Apply Material Design theme
- ☐ Add animations and transitions
- ☐ Implement dark mode
- ☐ Add input validation
- ☐ Create custom widgets for reusability

### Phase 4: Additional Features (Day 5)

- ☐ Implement history feature with local storage
- ☐ Add favorites functionality
- ☐ Create about/settings screen
- ☐ Add help/instructions
- ☐ Implement error handling

## Phase 5: Testing & Optimization (Day 6)

- ☐ Test all conversions for accuracy
- ☐ Test on different screen sizes
- ☐ Test dark/light mode switching
- ☐ Fix bugs and edge cases
- ☐ Optimize performance
- ☐ Test offline functionality

## Phase 6: Play Store Preparation (Day 7)

- ☐ Create app icon (512x512)
  - ☐ Take screenshots (4-6 different screens)
  - ☐ Create feature graphic (1024x500)
  - ☐ Write app description
  - ☐ Create privacy policy
  - ☐ Generate signed APK/AAB
  - ☐ Fill Play Store listing
- 

## 7. Play Store Requirements

### App Assets Needed

#### App Icon

- Size: 512x512 pixels
- Format: 32-bit PNG
- No transparency
- Design: Simple, recognizable icon with conversion symbol

#### Feature Graphic

- Size: 1024x500 pixels
- Format: JPG or PNG
- Showcase: App name + key feature visual

#### Screenshots

- Minimum: 2 screenshots
- Recommended: 4-6 screenshots
- Size: 16:9 or 9:16 aspect ratio

- Show: Main features, different conversion categories, clean UI

**Short Description** (80 characters max) "Fast & accurate unit converter. Convert length, weight, temperature & more!"

**Full Description** (4000 characters max)

Unit Converter Pro - Your All-in-One Conversion Tool

Convert units quickly and accurately with our simple, easy-to-use app. Perfect for students, professionals, travelers, and anyone who needs quick conversions.

#### ✨ FEATURES:

- 6 conversion categories with 30+ units
- Real-time conversion as you type
- Offline functionality - no internet required
- Clean, modern interface
- Dark mode support
- Conversion history
- Completely free with no ads

#### 🔧 SUPPORTED CONVERSIONS:

- Length: meters, kilometers, miles, feet, inches, and more
- Weight: kilograms, pounds, ounces, grams
- Temperature: Celsius, Fahrenheit, Kelvin
- Volume: liters, gallons, cups, milliliters
- Area: square meters, acres, hectares
- Speed: km/h, mph, m/s, knots

#### 🌟 WHY CHOOSE UNIT CONVERTER PRO?

- Lightning fast conversions
- High precision calculations
- Simple and intuitive design
- Works completely offline
- No annoying ads
- Regular updates

Perfect for:

- ✓ Students doing homework
- ✓ Travelers abroad
- ✓ Cooking and recipes
- ✓ Construction and DIY projects
- ✓ Fitness tracking
- ✓ And much more!

Download now and make conversions easy!

## Privacy Policy

You need a privacy policy URL. Create a simple page stating:

- What data you collect (if using `shared_preferences`, state you store data locally only)
- No data is transmitted to servers
- No personal information collected
- No third-party tracking

Host on: Google Sites, GitHub Pages, or your own website

## Content Rating

In Play Console, complete the questionnaire:

- Select "No" for violence, inappropriate content, etc.
- App should be rated "Everyone"

## App Category

- Category: Tools
  - Tags: converter, unit, calculator, measurement
- 

## 8. Code Snippets & Examples

### Main App Structure

```
dart

void main() {
  runApp(
    MultiProvider(
      providers: [
        ChangeNotifierProvider(create: (_) => ConversionProvider()),
        ChangeNotifierProvider(create: (_) => ThemeProvider()),
      ],
      child: const MyApp(),
    ),
  );
}
```

### Conversion Logic Example

```
dart
```

```
double convertLength(double value, String fromUnit, String toUnit) {  
    // Convert to base unit (meters)  
    double meters;  
    switch (fromUnit) {  
        case 'Meters':  
            meters = value;  
            break;  
        case 'Kilometers':  
            meters = value * 1000;  
            break;  
        case 'Miles':  
            meters = value * 1609.34;  
            break;  
        // Add other cases  
    }  
  
    // Convert from base unit to target  
    switch (toUnit) {  
        case 'Meters':  
            return meters;  
        case 'Kilometers':  
            return meters / 1000;  
        case 'Miles':  
            return meters / 1609.34;  
        // Add other cases  
    }  
}
```

---

## 9. Testing Checklist

### Functional Testing

- ☐ All conversion categories work correctly
- ☐ Calculations are accurate (test with known values)
- ☐ Swap button reverses units correctly
- ☐ Clear button resets all fields
- ☐ Input accepts decimal values
- ☐ Large numbers display correctly
- ☐ Invalid input is handled gracefully

### UI Testing

- ☐ App looks good on small screens (5")
- ☐ App looks good on large screens (6.5"+)

- ☐ All text is readable
- ☐ Buttons are easily tappable
- ☐ Dark mode works properly
- ☐ Animations are smooth
- ☐ Navigation works correctly

## Edge Cases

- ☐ Very large numbers (1,000,000+)
  - ☐ Very small numbers (0.000001)
  - ☐ Zero values
  - ☐ Negative temperatures
  - ☐ Same unit conversion (km to km)
- 

## 10. Launch Checklist

### Pre-Launch

- ☐ All features tested and working
- ☐ App icon looks professional
- ☐ Screenshots showcase key features
- ☐ Privacy policy published online
- ☐ App description is clear and compelling
- ☐ Version number set (1.0.0)
- ☐ Build number incremented

### Play Store Submission

- ☐ Create Play Console account (\$25 one-time fee)
- ☐ Upload signed AAB (Android App Bundle)
- ☐ Fill all required fields
- ☐ Upload all graphics
- ☐ Set pricing (Free)
- ☐ Select countries/regions
- ☐ Complete content rating
- ☐ Submit for review

### Post-Launch

- ☐ Monitor crash reports
- ☐ Respond to user reviews
- ☐ Plan future updates
- ☐ Track downloads and ratings

---

## 11. Future Enhancements (v2.0)

Potential features to add later:

- Currency converter with API
  - Custom unit creation
  - Widget for home screen
  - Share conversion results
  - Scientific units
  - Multiple languages
  - Unit conversion formulas display
  - Voice input
  - Tablet UI optimization
-
